High-Tension Multi Tenor Drums are designed for the professional player for use in competitive marching situations and in drum line performance. Utilizing a high-tension tuning system the ultra-light design offers clear sound production with maximum tonal projection.

The shallow cut of the 6-ply shells provides well balanced depth to diameter proportions allowing maximum resonance, focus and a power boost while the rounded bearing edges help eliminate unwanted overtones. Internal aluminium reinforcement rings ensure that shells remain round under high tension and prevent damage to the bearing edge. Additional tuning screws enable accurate tuning and equal dispersion of tension while ultr...

Design features

Ultra-light built waterproof bonded shallow-cut 6-ply shells with weather-proof lacquering of the inside, bearing edge re-inforcement for high head tension from 8" on, edge protector at the bottom sides, chromed triple-flanged rims, tuning key

High-Tension Multi Tenor Drums are designed for the professional player for use in competitive marching situations and in drum line performance. Utilizing a high-tension tuning system the ultra-light design offers clear sound production with maximum tonal projection.

The shallow cut of the 6-ply shells provides well balanced depth to diameter proportions allowing maximum resonance, focus and a power boost while the rounded bearing edges help eliminate unwanted overtones.

Internal aluminium reinforcement rings ensure that shells remain round under high tension and prevent damage to the bearing edge.

Additional tuning screws enable accurate tuning and equal dispersion of tension while ultra-light lugs offer proven sturdiness and minimum weight.

Without consuming assembly all sets can be used together with the Lefima Plug & Play Carrier system or the Multi Tenor Stand #ZS-TIM-1615-TOM by simply plugging on the adapter. Even a quick and efficient change from stand tom carrier and vice versa is guaranteed.

Adequate Adapter

This adapter operates with any Lefima multi-tom set, regardless if it is a trio, quad, quint or six.

As a proper playing position is essential for producing good sound quality throughout the rhythmic passage regardless if there are scrapes, crossovers or sweeps, the Lefima harness system is fully adjustable:

For a maximum playing comfort, the distance of the multi toms can be adjusted infinitely towards the player. To factor different sizes and shapes of Tenor drummers, the multi-tom set can be tilted towards the player. The angle is infinitely adjustable and has a memory function, which remembers the angle even after the adapter was dismantled for transport.

In addition, the basic harness can be infinitely adjusted to fit any body size and shape.
