

The new generation of intelligent carrying systems

Item-#: Flex-Uni

Detailed information can be found at www.lefima.de

The "Universal Flexi-Carrier" is a completely new concept of flexible carrier systems, suitable for 4 different types of drums: An ergonomically padded and highly reinforced support system with adjustable shoulder and hip straps offers unprecedented wearing comfort and functionality!

The supporting back part as well as the shoulder and waist straps are designed according to ergonomic aspects and are generously padded with breathable spacer fabric. The padded belly plate absorbs weight from the shoulders and distributes it to the rigid back plate, which allows the drum to be worn comfortably over extended periods.

Design features

Black textile, anatomically back plate padded with breathable spacer fabric, shoulder and waist straps designed according to ergonomic aspects, padded belly plate with integrated stick holder, 6 solid revolving snap hooks
