A World First from our Timpani plant: Ultra-light Timpani half in weight and a touch of silver

The appearance of the "Leggero" model is a reminiscence of the legendary silver timpani of Dresden and London. The bowls are however made from a special light alloy with an exceptional sound which resembles the sound of copper in an astounding manner. Highly polished this alloy is like the precious silver. It also makes the instruments light as a feather. Compared with conventional screw-tuned timpani the "Leggero" weighs just half!

Design features

Handhammered bowl made from a special aluminium alloy, steel-angle counterhoop and hand forged rosette fittings in forgen-iron look, easy going t-handle screws, hand-turned height adjustable foldable wooden cross stand with levelling screw for compensating floor bumps

Item-#	Shell/Bowl (Inch)	Shell/Bowl (cm)	Tonerange	Heads	Tension Screws	Weight (lbs / kg)
