Ready to play in seconds!

As the name "Plug & Play" implies - simplicity is the key to this carrier system: Extremely comfortable to carry and easy to adjust.

The "Plug & Play" Carrier can be adjusted in length, shoulder height and width and individually adaptable to many different body heights and figures. Anatomically designed for even the tallest people "Plug & Play" provides true comfort even over longer distances.

Up to 8 different instrument types can be carried with different adapters, so simply "Plug & Play"

Adequate Adapters

This adapter works with any drum which has two carrying hooks that lie side by side. Unlike other carriers no further holding fixtures are required to be mounted on the drum itself. The Lefima Carrier System is not only extremely quick to configure but also allows the drum shell to vibrate fully.

The bass drum is attached with two hooks that are width adjustable. It is supported by an infinitely adjustable pressure pad with auto balancing ball joint. With this adaptor the drum is securely fixed to the carrier and always remains stable.

2 width adjustable hooks, infinitely adjustable pressure pad with autobalancing ball joint
