Detailed information can be found at www.lefima.de

An easily accessible hand operated lever provides a reliable and effective adjustable dampening system

This portable glockenspiel is the ideal choice for travelling or for integration in a set-up, which leaves no room for a foot pedal. It features an easy to use hand-damper; the dampening effort is infinitely adjustable and the damper can also be completely switched-off. The bars correspond to those of the HPG and EPG models.

Design features

Freely suspended bars made from a special aluminium alloy, sensible hand damper, 1 pair of sticks

Item-#	Tonerange	Material	length(cm)	Weight (lbs / kg)
KM-HHG-F1F4-000	f' – f''''	Leichtmetall / light metal	94	9.0
KM-HHG-G1C4-000	g' – c''''	Leichtmetall / light metal	94	8.1

Product Features

Notation - Sound

Abnehmbarer Kofferdeckel

When the case is open, the top can be detached for playing. At the same time it is the main part of the trolley-case, in which the...

Vibration-neutral Suspension of Bars

Like at professional high-end instruments, the vibration-neutral suspension of the bars is solved by cross drills. This guarantees...

Bars made from light metal

The bars are made from a specially alloyed light metal which is responsible for a brilliant and well-balanced sound and a low inst...

Tuning

The intonation of the instruments refer to the standard pitch $a' = 440$ Hz. The frequencies in other octave ranges are adopted.

Playing Height Comfort Adjustment

The travel of the damping pedal remains unchanged!

Accessories

Bar Extension Set

With the bar extension set the HPGL 2.5 can be enlarged to a full 3 octaves instrument. (f' - f''')

Foldable Stand

This heavy duty stand is made from robust coated metal and can be set-up easily. The large rubber pads ensure a secure base of the...
