The ultra-light version of the parade drum with tension screws and deco rope. UNBEATABLE Rims included!

This hybrid of historical instrument and modern technology offers significant advantages in terms of sound and handling and especially an ultra-light weight construction - coupled with UNbeatable rims made of aircraft aluminum in vintage style!

Go with the times. Play instruments which fit optically into the historical picture, but have all the tonal and technical features of a modern marching drum which serve the grand requirements of today's drummers: The UNBEATABLE rims can not only be designed individually; the used aircraft aluminum is supremely robust and ensures an enormous tuning accuracy.

Tension screws enable the separate equal tuning of batter and snare side head as well as a quick and trouble-free head change; the additional deco rope keeps the visual relation to the historic instrument. An integrated rope lock prevents the rope from falling down when changing the head.

As the name suggests, the Ultra-light "Vintage Hybrid" offers a unique low weight!
