

Item-#: HPG STEP

Detailed information can be found at www.lefima.de

These glockenspiels have raised semitones and thus meet the demands of musicians who are used to such instruments with regards to the diapason.

They combine excellent sound characteristics with operating comfort and unique portability. These high quality concert instruments extend far beyond their price range. The well tempered bars tuned by hand using the latest modern electronic technology that results in a harmonically pure and well balanced sound. Both the bars and the frame are manufactured from a lightweight metal and the stand is very quickly set up and dismantled.

Design features

Infinitely adjustable playing height, freely suspended bars made from a special aluminum alloy with raised semitones, sensitive pedal damper, adjustable damper horizontal for separate adjustment at low and high notes, extremely quick set-up by magnetic support without screws, light wooden resonance frame mounted in sturdy case, case top detachable; for transport the stand can be folded and stored inside the case which is designed as trolley. The indicated weights are without stand.

These glockenspiels have raised semitones and thus meet the demands of musicians who are used to such instruments with regards to the diapason.

They combine excellent sound characteristics with operating comfort and unique portability.

These high quality concert instruments extend far beyond their price range. The well tempered bars tuned by hand using the latest modern electronic technology that results in a harmonically pure and well balanced sound. Both the bars and the frame are manufactured from a lightweight metal and the stand is very quickly set up and dismantled.

The professional vibration-neutral suspension of the bars via a transverse bore guarantees optimum tonal

quality. The instrument is mounted on a lockable trolley.

The damper pedal is effective and easy to control. The damper is adjustable allowing separate adjustment for low and high notes.

The height of the instrument is infinitely adjustable. (85 - 95 cm) This does not affect the travel of the pedal.
