Detailed information can be found at www.lefima.de

This "Art Nouveau Ensemble" is produced in the highest quality craftsmanship and embodies the unique amalgamation of a tremendous bass and sensitive, soft as butter acting tab screw technology with the beautiful design according to the Roaring Twenties.

The bass drums of the "Sinfonia" -Vintage series are constructed according to the motto of a time that - after industrial mass production - put the values of quality craftsmanship into the foreground. People pursued to melt art and life together again and to include design in the everyday and to express its function in its design. The drum-stand-ensemble captivates the eye with its elegant but clear style of decorative curved lines and ge...

This "Art Nouveau Ensemble" is produced in the highest quality craftsmanship and embodies the unique amalgamation of a tremendous bass and sensitive, soft as butter acting tab screw technology with the beautiful design according to the Roaring Twenties.

The bass drums of the "Sinfonia" -Vintage series are constructed according to the motto of a time that - after industrial mass production - put the values of quality craftsmanship into the foreground. People pursued to melt art and life together again and to include design in the everyday and to express its function in its design.

The drum-stand-ensemble captivates the eye with its elegant but clear style of decorative curved lines and geometric decoration.

The wood of the drum is glued according to the Lefi-

ma method of the twenties and noble stained. It gives the instrument a bassy rich sound and - beyond - emotional depth.
