Product Features

Unbeatable Rims

The rims are made from aircraft aluminum and are extremely light and exceedingly robust; to wooden rims they have a significant advantage...

Rust-proof Metal Shell in ultra-light design

With its cool „Brushed-Metal-Look“ this drum is easy to care for.

Mini Lugs in noble chrome or brass finish

The key factor within the design of the lugs was sturdiness and low weight. The use of aircraft aluminium provided both these qualities...

Equipment

Repositionable Ring Control

This ring control is the easiest method to dampen overtones. Unlike other ring controls the Lefima ring is adhesive and sticks to ...

Light Mini Strainer

This strainer comes from the design line of our ultra-light drums and is characterized by its extremely low weight.

Multi-angle Carrying Bar

This carrying bar facilitates traditional as well as matched-grip playing. A carrying bar is necessary when using a FlexiCarrier ...

Flexi-leg rest

The Flexi-leg rest is infinitely adjustable in height and so can be adapted according to your individual needs.

Accessories

Flexi-leg rest

The Flexi-leg rest is infinitely adjustable in height and so can be adapted according to your individual needs.

Flexible Leg Rest

All flexi-series leg rests are super padded and adapt to the movements of the thigh with every step. Made from stainless steel the...

Multi-angle Carrying Bar

This carrying bar facilitates traditional as well as matched-gripping playing. A carrying bar is necessary when using a FlexiCarrier ...

Leg Rest

The 600 series leg rests are super padded and made entirely from stainless steel. This leg rest is falls naturally tow...

Carrying Slings for Side Drums

All carrying slings are made from high-quality genuine leather or textile. Self-balancing carabiners prevent that the sling ...

Stick Holder

The stick holder is easily attached to the belt and offers convenient and practical storage for a pair of sticks

Carrying Hook

The carrying hook is simply attached to the belt.

ZDH Carrier

The ZDH Carrier Program is competitively priced The shoulder bails are infinitely height adjustable enabling the ZDH-c...

Plug & Play Carrier

As the name "Plug & Play" implies - simplicity is the key to this carrier system: Extremely comfortable to carry and easy to a...

SoftBags

Our Soft-Bags for bass drums are super padded and provide almost as much protection as a traditional hard case. Durable and ...

Add-on Legs

Legs protect your instrument against damage and dirt when putting it down. These small legs fit unremarkably and harm...

Internal Tone Control

The pressure of this permanently installed muffler is infinitely adjustable and can also be turned off completely

The result of 155 years of experience in drum manufacture:

Traditional design in harmony with elaborate technology!

The drums of this line follow in principle historical models from the first half of the 20th century, however feature some essential and appropriate innovations:

Shell, hoops and lugs are manufactured in proven **LEFIMA-ultralight design** and matched to perfection.

The **rims** are made from aircraft aluminum are extremely light and exceedingly robust; to wooden rims they have a significant advantage with regards to durability and distortion resistance. The sturdy material distributes the forces produced by the tension screws more evenly on the whole rim, as is possible with

wooden rims. The result is an enormous tonal accuracy!

The somewhat lower rims allow a more natural stick posture, which guarantees fatigue-free playing.

The **Flexi-leg rest** is infinitely adjustable in height and so can be adapted according to your individual needs. It is constructed as a hinge, making the movement of the leg while marching. In this way, the drum can be carried exceptionally comfortable and stable. The wearing comfort is even more increased by a super padded rest which is more than twice as wide as normal leg rests.

With the **multi-angle carrying bar** also the angle of the drum can be flexibly adjusted according to your demands.

By itself understood that batter and snare side head can be tuned separately and so contribute to the modern requirements of a marching drum.

Space for your notes
